How to Use the Scorecard

The Data Quality Report is designed to help you understand, assess and improve key organizational data quality issues. Instructions on each page will help you understand the data and what you can do about it.

Once you have consumed the report yourself, Info-Tech recommends the following discretionary steps:

1. Share Results with Your Data Team

Walk through this report with your team. Cover overall results and key areas, encouraging them to review the full report if interested. Beyond understanding the data, communicating the importance of measuring and improving business satisfaction with data quality is critical.

2. Provide Training as Requested

Use the Training View to book training immediately for interested business leaders and teams. Work with your team to establish who should lead each training session.

3. Communicate Results and Planned Action with Business Leaders

Share this report with executives or the management stakeholder (group) ultimately concerned with the effective use of organization data. Highlight key issue areas, proposed solutions, and get direction on goals and issues to address.

4. Determine Key Applications and Quality Issues to Target

Using the data, management preferences, and input from your team, determine where to focus improvement efforts.

5. Create & Execute a Business Leader Engagement Plan

Using the data in this report, work with your team to determine key stakeholders who require better data quality. Assign a manager for each relationship and plan out meeting objectives and frequency. Engage individual business leaders around their data needs. Use individual Department Scorecards, Application Scorecards and Comments as a conversation starting point.

6. Execute Targeted Data Quality Improvements

Pull together improvement initiatives from your team, executives and stakeholders. Create plans for undertaking them and have your team begin to execute them.

7. Repeat this Program as Needed

Complete this program annually or as desired to measure and communicate improvement, as well as receive ongoing feedback.

Data Quality Scorecard

Use this **Application Scorecard** to understand how satisfied respondents are with Data Quality across 10 dimensions.

Follow up with respondents from the department to better understand their concerns. Ensure you work closely with this application's owner or assign one if there is no owner.

For each satisfaction breakdown:

"Satisfied": 8/10 or above.

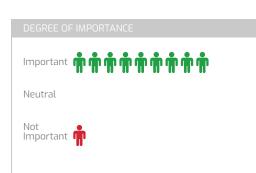

"Neutral": 7/10.

"Not Satisfied": 6/10 or below.

Owner Martine Leroux Departments Using IT, Sales, Marketing ... **Confidence 68**% How confident are you with the quality of the data found in this application?

Clarity

How satisfied are you that the data in this application is clear. Data is easy to understand and interpret.

Accuracy

How satisfied are you that the data in this application is accurate. Data values are correct and accurately reflect reality.

Currency

How satisfied are you that the data in this application is current. Data is appropriately up-to-date, not outdated.

Completeness

How satisfied are you that the data in this application is complete. All required data is captured, and no data is

Hygiene

69%

79%

How satisfied are you that time-dependent activities (e.g. tasks, cases, jobs) are appropriately managed to maintain datá cleanliness and quality.

Availability

How satisfied are you that the data in this application is available. Appropriate data levels

Entry Ouality

How satisfied are you that the data in this application is easy to enter. Quality and appropriate validation of data entering applications

Uniqueness

How satisfied are you that the data in this application is unique. Each data element is captured in one spot, not duplicated across multiple fields

Training View

Training View How to Use this Information

Often data and reporting issues can be resolved through training alone and require no technical or process-based solution.

Providing training is something you can do right now to improve business satisfaction and help your stakeholders get the most out of data and reporting.

Use this information to book training sessions immediately. This is a quick win and there is no reason to wait.

Use the attendee lists provided when booking the training. Read each comment to determine specific training needs, or if there are specific requests or concerns from stakeholders.

If anything in the comments or attendee list seems out of the ordinary, follow up with respondents directly to understand their needs and resolve the issue.

RESPONDENTS REQUESTING TRAINING

Respondent	EMAIL	DEPARTMENT	COMMENTS
Diego Fernandes	dfernandes@abxmedia.com	Sales	Data entry is difficult. Sales people need better training on how to update records to keep things current.
Leah Holmvik	lholmvik@abxmedia.com	Sales	Onboarding new employees isn't very efficient. We could use a basic introduction to the software as people join the department.
Alan Smithee	alansmithy@test.com	Sales	Customizing our existing report set, and creating new ad-hoc reports.
