

An Incept Data Solutions Professional Services Offering

Alation

Augmented "Right Start"

Data Catalog Adoption for a Data-driven Culture

The Augmented Right Start from Incept Data Solution is aimed at IT organizations of larger organizations and complements the Alation Right Start program. While the Right Start program is adequate for a small or departmental roll-out, it is incomplete for an IT organization responsible for incrementally deploying Alation to business divisions and departments or integrating new data domains quickly and efficiently.

Our Alation experts will define and help you put in place the following:

Implementation Strategy & Plan

- Integration approach
- Conversion strategy
- Implementation environment
- Methods and adjunct tools
- Identification of deployment sites
- Disaster recovery/HA strategy
- Deployment strategy

Testing Strategy & Plan

- Environment control
- Teaming & processes, RACI
- Planned testing activities & tools
- Defect tracking and resolution approach

Knowledge Transfer, Training Plan

- Knowledge requirements
- Knowledge transfer plan
- Training requirements and & plan

Operational Impact Specification

- Operational profile and SLAs
- Growth estimates
- Integration points & security

Adjustments to Data Governance Strategy
